Your Trusted Partner in Traffic Safety Since 1956

At Flasher Equipment, we're proud to serve Texas with over 65 years of experience in traffic safety solutions. Our mission is simple: to provide the highest quality products, fast and reliable service, and expert support for every project—large or small.

Whether you're managing a construction zone, equipping a city fleet, or marking roadways, we have the tools and expertise to keep your team safe and your job on track. From signage and pavement marking materials to dependable traffic control equipment and advanced vehicle lighting, we've got you covered.

Our in-house custom sign shop and well-stocked warehouse allow us to fulfill orders quickly and accurately. We work with cities, counties, contractors, and private companies across the state—delivering tailored solutions with fast turnaround times and unbeatable service.

Thank you for considering Flasher Equipment.
We look forward to helping you build safer roads and communities.

- Available in different sizes and configurations

CONSTRUCTION SIGNS

Corrugated plastic signs (often referred to as coroplast signs) are a reliable, lightweight option for temporary construction signage. Designed for quick setup and short-to-medium-term use, these signs are ideal for utility work, residential projects, and low-speed work zones where flexibility and cost-effectiveness are key.

TEMPORARY SIGN SUPPORTS

Overlay Options:

Overlay (1)

AHEAD	500 FT	1000 FT
1500 FT	1/2 MILE	1 MILE

Roll-Ups

ROLL UP SIGN STANDS

"Big Buster" Roll-Up Sign Stand

Built with rugged construction and wind-resistance in mind, it is the TxDOT-preferred stand for roll-up signs used in high-speed roadways, interstates, and major construction zones.

- Heavy-Duty Steel or Aluminum Base with wide, weighted legs for increased surface contact and stability.
- Dual Coil Spring Mechanism absorbs wind gusts and vehicle drafts without tipping or flexing.
- Universal Sign Mount compatible with 36" and 48" roll-up signs
- Adjustable Height Options ensures compliance with TxDOT and MUTCD visibility standards.

Zephyr® Roll-Up Sign Stand

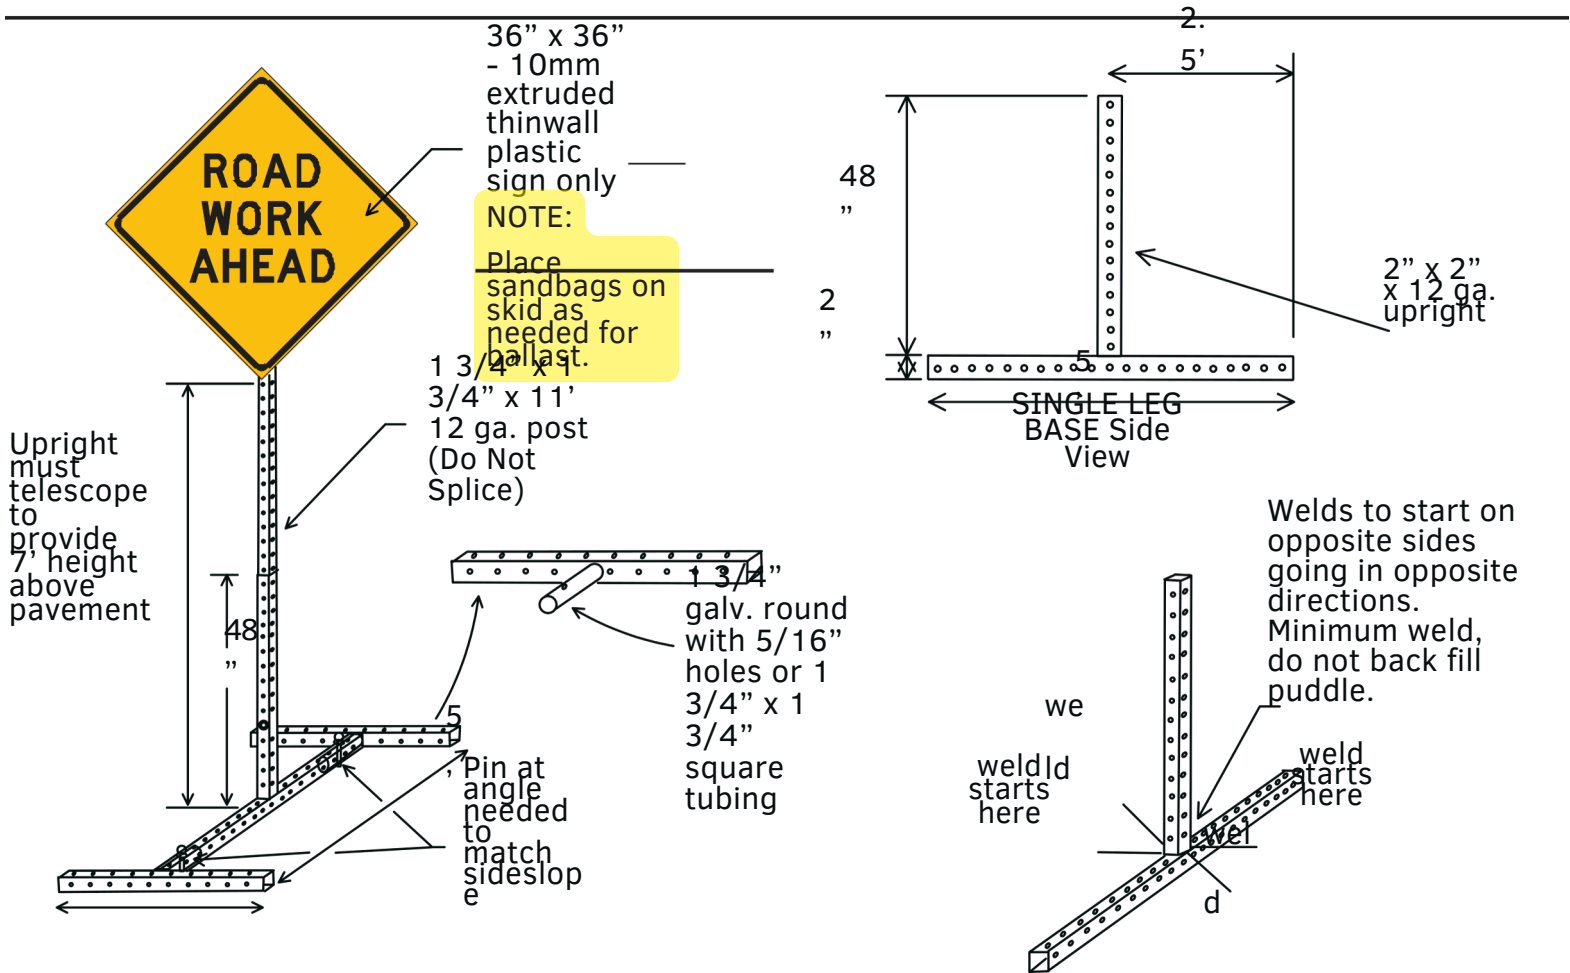

A compact, rubber base sign stand designed for quick deployment and dependable performance in temporary work zones.

- Heavy Rubber Base (38 lbs) made from recycled rubber, no sandbags needed.
- Low Profile Design
- Universal Compatibility -accepts 36" and 48" roll-up signs with sewn, plastic, or corner pockets.
- Stackable for Storage & Transport
- MUTCD & NCHRP-350 Compliant - approved for use in temporary traffic control zones.

Other Sign Stand Options:

- Lightweight sign stands
- "Little Buster" sign stands
- Single Spring sign stands
- No Spring sign stands

TEMPORARY SIGN SUPPORTS

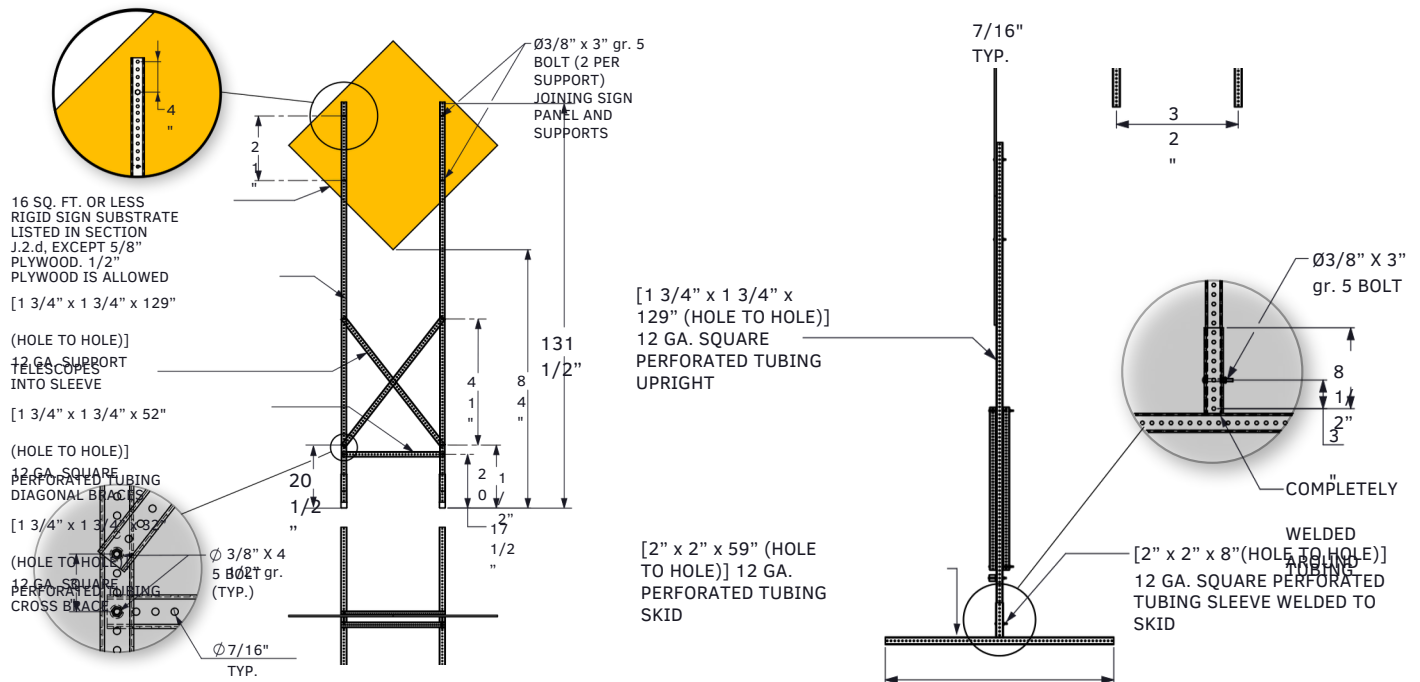

"TLSP"- "SPECIAL EVENT" SIGN STAND

Reliable, Low-Profile Sign Display for Temporary Work Zones

This product is designed exclusively for use with corrugated plastic signs. It displays signage at a lower height without sacrificing visibility, making it an excellent choice for shoulder work or roadside jobs. The base is typically wide, weighted, or sand-fillable to enhance stability and prevent tipping in windy conditions. Built for durability, it's ideal for short-term projects, emergency closures, and mobile work zones.

Common Applications:

- Shoulder closures or roadside utility work
- Temporary lane closures on low- to mid-speed roadways
- Roadside warning or regulatory signs where post installation isn't practical

DUAL LEG PSST™ SKID SUPPORT SIGN STAND

Durable, Compliant Mounting for Full-Height Roadside Signage

The Dual Leg PSST Skid Support is a rugged, reusable sign mounting system built to meet TxDOT and MUTCD requirements for a full 7-foot mounting height. Ideal for temporary or semi-permanent traffic control, it features a heavy-duty PSST (Perforated Square Steel Tube) frame and dual welded skids for added stability. This design eliminates the need for post-hole installation, offering a dependable and reusable solution that delivers strength, compliance, and convenience.

Common Applications:

- Temporary or semi-permanent traffic control signage
- Roadside work zones requiring MUTCD-compliant 7-foot sign height
- Projects where ground penetration is not feasible or permitted

PAVEMENT MARKINGS

Flasher Equipment offers high-performance thermoplastic pavement markings sourced from the industry's most trusted manufacturers. Engineered for durability, retroreflectivity, and full compliance with TxDOT and MUTCD standards, these materials deliver superior performance in a wide range of applications.

Hot-Applied Thermoplastic

Designed for high durability and enhanced visibility, hot-applied thermoplastics are glass bead-infused and available in extrudable or ribbon-applied formats. These TxDOT-approved formulations offer excellent flow, skid resistance, and retroreflectivity, even under challenging conditions. Available in white, yellow, and custom colors.

- **Long-Lasting**
- **Skid Resistant**
- **Excellent Nighttime Visibility**

Pre-Formed Thermoplastic

Pre-formed options allow fast, torch-applied installation with no preheating required. Available in flexible, customizable designs—ideal for legends, arrows, word markings, and crosswalks. Primerless options are available and deliver high retroreflectivity from day one.
